

About Lightspeed

Lightspeed is an engineering company specializing in infrared classroom audio technology. These easy-to-use audio systems are designed to deliver optimum speech intelligibility, overcome classroom noise and provide crystal clear sound to all students regardless of where they may be seated or where the teacher may be standing. In addition, teachers report reduced vocal fatigue, improved classroom management, and increased academic performance without changing curriculum or teaching methods.

History

Established in 1990, Lightspeed Technologies, Inc. manufactured professional wireless microphones used in the entertainment industry. In 1994 Lightspeed introduced a line of high-quality classroom audio systems and made a total commitment to improve the learning environment for students across the country. Lightspeed continues investing in research and development to provide the best technology and most reliable products in the industry.

Reputation

Lightspeed's reputation for product innovation, quality, and outstanding service is unmatched. Our popular installed classroom audio systems are primarily used for renovation and new construction projects, while the transportable systems are ideal for existing classrooms. Lightspeed is the only manufacturer offering an all-in-one, no install classroom audio system called the REDCAT, utilizing NXT™* flat-panel speaker technology. To complement all our classroom audio systems, we offer the REDMIKE... the smallest, lightest and most durable infrared microphone in the industry.

Lightspeed's local classroom audio consultants are experienced professionals dedicated to improving the learning environment for all children and providing superior customer service.

*NXT is a trademark of New Transducers Limited.

Mission

Lightspeed Technologies exists to make a significant improvement in the listening and learning environment for all children, and to provide teachers with tools that enhance their ability to maintain attention and manage the classroom.

Values

Lightspeed Technologies believes that all children deserve equal access to classroom instruction. We are dedicated to providing the best listening-learning environment possible, ensuring every student hears every word, every time.
