

Can classroom audio really make a difference in your schools?

Lightspeed's Action Research Program provides you with the research tools you need to experience and assess the benefits of classroom audio. Simply share with us your research parameters and we'll help tailor an assessment program that demonstrates whether classroom audio can make a difference in your schools.

Key Elements of the Action Research Program

- As a participating district, you will receive a significant discount of off educational pricing.
- Lightspeed will cover the cost of installation and conduct in-service training for all participating teachers.
- Based on your assessment goals, we will tailor an online survey that will be periodically distributed to gather experience feedback.
- Results from the survey will be compiled for your final analysis and reporting.

To Qualify for the Action Research Program

1. Actively considering district-wide implementation of classroom audio technology.
2. Program has sponsorship at the district level.
3. Involve school/district employees who will plan and execute the program.
4. Provide Lightspeed with final analysis and summary of the results to publish.

Program Benefits

- Systems are offered at a significant discount off educational pricing, providing schools with a cost effective way to conduct an Action Research Program
- NO FEE for installation of systems
- Assistance from Lightspeed to define research objectives and the development of measurement tools
- Research results that provide data relevant to district goals
