

Classroom Audio Evaluation Program

Lightspeed Technologies offers a no obligation evaluation program that provides the opportunity to try a classroom audio system at no charge.

At the end of the evaluation, the equipment can be purchased or returned with prepaid shipping labels.

A typical school evaluation works like this:

1. We provide a classroom audio system upon request.
2. The system is used in a classroom to evaluate the benefits for teachers as well as students.
3. At the end of the evaluation, the equipment is purchased or returned at Lightspeed's expense.

The end result is that a teacher experiences classroom audio and the school evaluates the system's effectiveness, with no obligation to purchase.
